GROVE PARK EVERGREEN LAWN GRASS

In the South we have often found trouble in getting lasting lawn because no one grass will give satisfactory results. We spent years in studying, research and experiments to find the exact combination of grasses which would produce the soft lactic evergreen lawn in this climate. Grove Park Lawn Grass is the result of the studies and experiments, it is the only grass on the market made specially for this locality. Sow 1 lb. to 300 square ft. or 75 lbs. per acre, use 12 lbs. of Vigoro to 300 square feet. If soil is acid apply agriculture lime to lawn.

INSECTICIDES & FUNGICIDES

TRI-GEN

Combined Spray Treatment

Fungicide—Insecticide—Plant Stimulant
 Complete Protection against Plant Insects and Diseases

In the past, Mildew and Black Spot have been most difficult to combat. However, these diseases are now easily controlled with the Tri-ogen Spray Treatment, which gives COMPLETE protection against all diseases and insect pests. It is easily applied and also acts as a plant stimulant—producing vigor in growth with resultant luxurious blooms, heretofore considered impossible. The Tri-ogen Spray Treatment applied weekly, from early season until late frost, makes it possible for the amateur to achieve the success, in many cases, comparable to the professional grower.

TRI-GEN was officially adopted for the exclusive protection of the Garden of 6000 Roses, at the CENTURY OF PROGRESS, Chicago World's Fair.
